

# Learning from Accidents

Learning lessons from  
events that have shaped  
the nuclear sector

**October 2nd 10:00 AM**  
Microsoft Teams

The international nuclear energy sector has an excellent safety record - in order to do this effective organisational learning and a robust safety culture have been critical. Learn about the events that have shaped the nuclear sector, the lessons learned and discover the design and operational enhancements that have been implemented to drive continuous safety improvement.

The session will include speakers from the UK, Ukraine and Japan.

Register to attend via the QR code.
